JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Vol. 372 Nos. 1 and 2 **CONTENTS** JULY 18 1994

In Memoriam 1

Regular papers

Ac stripping voltammetry from mercury film electrodes. Part 1. Theoretical analysis
F.J. Rodríguez Nieto, R.I. Tucceri and D. Posadas (La Plata, Argentina) 3

The application of the MPB4 theory to the interface between two immiscible electrolyte solutions Part 1. The differential capacitance of the water | nitrobenzene interface
Q. Cui, G. Zhu and E. Wang (Changchun, China) 15

Prediction of the Gibbs energy of ion transfer across the water | nitrobenzene interface using three new topological indices
H. Wang, Y. Yao and E. Wang (Changchun, China) 21

The impedance of an electrode for the situation where there is a discontinuous change of the electrode condition with potential due to the formation of a two-dimensional condensed phase
R.D. Armstrong (Newcastle upon Tyne, UK) 27

Calculation of impedance spectra by Laplace transformation of voltage transients generated by current-step excitation
M. Neumann-Spallart and M. Etman (Meudon, France) 33

Ion transfer from water to formamide or 1,2-ethanediol studied by polarography at the electrolyte solution dropping electrode
M. Suzuki (Kyoto, Japan) 39

Electrochemical characterization of carbon pastes modified with proteins and polycations
J. Kulys (Vilnius, Lithuania), L. Gorton, E. Domínguez, J. Emnéus and H. Jarskog (Lund, Sweden) 49

Comparative spectroelectrochemical investigation of vacuum evaporated and electrochemically synthesized electrochromic polyaniline films
V.F. Ivanov, O.L. Gribkova, A.A. Nekrasov and A.V. Vannikov (Moscow, Russian Federation) 57

Photothermal deflection spectroscopy investigations of uranium dioxide oxidation
J.D. Rudnicki, R.E. Russo (Berkeley, CA, USA) and D.W. Shoesmith (Pinawa, Man., Canada). 63

Ionic properties in acetonitrile + water mixtures and dimethylformamide + water mixtures
R.E. Gregory, P.T. McTigue and J.M. Perera (Parkville, Australia). 75

Chronoamperometric and cyclic voltammetric study of carbon paste electrodes using ferricyanide and ferrocenemonocarboxylic acid
V.R. Taliene, T. Ruzgas, V. Razumas and J. Kulys (Vilnius, Lithuania) 85

STM study of photoelectrochemical plating on p-type silicon electrodes
S. Yoshihara, K. Endo, E. Sato (Tochigi, Japan) and J.O'M. Bockris (College Station, TX, USA). 91

Electrochemical and electrocatalytic properties of iron(III)-substituted Dawson-type tungstophosphate anion
S. Dong and M. Liu (Changchun, China). 95

Solvent and temperature control of the reaction mechanism and efficiency in the electrogenerated chemiluminescence of rubrene
A. Kapturkiewicz (Warsaw, Poland) 101

Electrochemical quartz crystal microbalance studies of self-assembled monolayers of 11-ferrocenyl-1-undecanethiol: structure-dependent ion-pairing and solvent uptake
K. Shimazu, I. Yagi, Y. Sato and K. Uosaki (Sapporo, Japan) 117

Mechanistic aspects of the electron and ion transport processes across the electrode | solid | solvent (electrolyte) interface of microcrystalline decamethylferrocene attached mechanically to a graphite electrode
A.M. Bond and F. Marken (Victoria, Australia). 125

Electrocatalytic oxidation of carbohydrates at copper(II)-modified electrodes and its application to flow-through detection
K. Kano, M. Torimura, Y. Esaka, M. Goto (Gifu, Japan) and T. Ueda (Kyoto, Japan) 137

A new homogeneous electrocatalyst for the reduction of carbon dioxide to methanol at low overpotential
G. Seshadri, C. Lin and A.B. Bocarsly (Princeton, NJ, USA) 145

A potentiostatic study of silver centres and their catalytic effect on hydrogen peroxide using carbon microelectrodes
J.P. Sousa (Porto, Portugal) 151

Reduced CO_2 on polycrystalline Pd and Pt electrodes in neutral solution: electrochemical and in situ Fourier transform IR studies
S. Taguchi, A. Aramata and M. Enyo (Sapporo, Japan) 161

Electrochemical behavior of [octaethylporphyrin iron(III)-σ-bonded pyrrole] and its electrocatalytic activity for the reduction of dioxygen
S. Dong, Q. Qiu (Changchun, China), R. Guilard and A. Tabard (Dijon, France). 171

Cathodic cleavage of organic compounds on electrodes coated with polymeric materials. Catalytic efficiency of solid cathodes modified by polyfluorenes or polydibenzofuran
J. Simonet, J. Rault-Berthelot, M.M. Granger and H. Le Deit (Rennes, France) 185

New on-line mass spectrometer system designed for platinum-single crystal electrode and electroreduction of acetylene
Y. Gao, H. Tsuji, H. Hattori and H. Kita (Sapporo, Japan) 195

Electrochemical process of formation of an insulating polypyrrole film
T. Osaka, T. Momma, S.-i. Komaba, H. Kanagawa and S. Nakamura (Tokyo, Japan) 201

Hydrogen evolution reaction: analysis of the Volmer–Heyrovsky–Tafel mechanism with a generalized adsorption model
M.R. Gennero de Chialvo and A.C. Chialvo (Santa Fe, Argentina) 209

Effects of surface modification on double-layer impedance of platinum electrodes in an acid solution. Part 1. Adsorption of carbon monoxide
H. Matsui and A. Kunugi (Tokushima, Japan) 225

Adsorption of tin on platinum: an uncommon underpotential deposition
E. Lamy-Pitara, L. El Ouazzani-Benhima, J. Barbier, M. Cahoreau and J. Caisso (Poitiers, France) 233

Voltammetric behaviour of irreversibly adsorbed SO_2 on a Pt(111) electrode in sulphuric acid medium
C. Quijada, J.L. Vázquez, J.M. Pérez and A. Aldaz (Alicante, Spain) 243

Ex-situ TDS investigation of carbon monoxide electrosorbed on polycrystalline platinum
R. Dalbeck, H.W. Buschmann and W. Vielstich (Bonn, Germany) 251

Short communications

On the application of the ^{125}I isotope for radiotracer adsorption studies (radiochemical considerations)
A. Kolics and G. Horányi (Veszprém, Budapest, Hungary) 261

New information on the unusual adsorption states of Pt(111) in sulphuric acid solutions from potentiostatic adsorbate replacement by CO
J.M. Feliu, J.M. Orts, R. Gómez, A. Aldaz (Alacant, Spain) and J. Clavilier (Meudon, France) 265

Two electrodes modified with metalloporphyrins via an ester linkage and their catalysis of the cathodic reduction of dioxygen
D.-W. Pang, M. Hu and Z.-L. Wang (Wuhan, People's Republic of China) 269

Comment

A comment on the article "on the application of ^{125}I isotope for radiotracer adsorption studies (radiochemical considerations), by A. Kolics and G. Horanyi", JEC 3292.
J.O'M. Bockris and M. Gamboa-Aldeco (College Station, TX, USA) 273

Preliminary notes

Modified electrodes from organic-inorganic hybrid gels containing ferrocene units covalently bonded inside a silica network
P. Audebert (Besançon, France), P. Calas, G. Cerveau, R.J.P. Corriu and N. Costa (Montpellier, France) 275

A novel approach to the polydiacetylene Langmuir–Blodgett film by the surface-specific optical third harmonic generation based on the angular momentum conservation rule
O. Sato, R. Baba, K. Hashimoto and A. Fujishima (Tokyo, Japan) 279

Anion adsorption on clean or copper modified Pt(111) and Rh(111) electrode surfaces studied by in-situ infrared reflection absorption spectroscopy
Y. Shingaya and M. Ito (Yokohama, Japan) 283

The origin of the discrepancy between the low frequency AC capacitances and voltammetric capacitances of conducting polymers
X. Ren and P.G. Pickup (Newfoundland, Canada) 289

Corrigendum 293

Erratum 295

Book review 297

Announcements 299
